O/O. DGM Monitoring, DHBVN, Hisar

Instruction No.44/MON/2010

To

All CEs (OP)/S.E.s(OP),
under DHBVN.

Memo No: Ch-43/MON-260 Dated: 11.02.2010

Subject: Segregation of rural domestic load from agriculture load.

It was decided by the management to segregate the rural domestic load from agriculture (tubewell) load under DHBVN. The instructions for the same were issued by CE/PD&C, DHBVN, Hisar vide No. 6/2006/PD&C dated 29.6.2006. As per instructions it was desired that under segregation of load new feeders to be created/erected shall be meant for rural domestic supply and the existing feeders shall be used for supply to the agriculture (tubewell) load. It was also decided that no AP consumers (tubewell) shall be connected to the newly erected feeders meant for rural domestic supply. The work on all the new feeders under segregation have been completed in all the circles alongwith village connectivity.

It has come to the notice of management that some of the AP consumers have been connected to the rural domestic feeders meant for domestic supply only by the field offices which have been viewed very seriously as with this the purpose of creating new feeders for segregation of loads by investing a huge amount failed.

It has been decided by the management that all GMs (OP) under DHBVN shall ensure that no AP consumer (tubewell) shall be connected/fed through the newly erected rural DS feeders. All the field offices under your jurisdiction i.e DGM/AGMs shall be directed to check/ verify their areas and furnish a certificate that no AP consumer (tubewell) stands connected with the newly DS rural feeders to your office within 15 days and further a consolidated certificate circle as a whole shall be furnished by the GM (OP) that no AP consumer stands connected with any newly erected rural domestic supply

feeder by 7.3.2010.

During verification if any AP consumer is found connected to the rural DS feeder the same shall be disconnected and arrangements be made to connect the same from nearest AP feeder.

The detail of such cases (AP consumers) which were found connected to DS rural feeders be prepared by clearly mentioning the name of the JE/SDO and shall be furnished alongwith above consolidated certificate.

All the field officers under your jurisdiction may be directed that in future no AP load (tubewell) shall be allowed to be connected to any domestic supply rural feeder, if any connection (agriculture) is found running on any DS rural feeder then strict disciplinary action against the concerned officer on fault will be taken.

The above instructions may be brought to the notice of all concerned for meticulous and immediate compliance

This issues with the approval of MD, DHBVN.

**Coordinator,
DHBVN, Hisar.**
