

**DAKSHIN HARYANA BIJLI VITRAN NIGAM LIMITED**

**Instruction No. 5 /2006/PD&C**

From

The Chief Engineer/PD&C,  
DHBVNL, Hisar.

To

All Superintending Engineers/OP  
Under DHBVNL.

Memo No.Ch. /  
Dated:29.6.2006

**Subject: Preparation of Schemes-NCR/APDRP/RIDF/REC**

As you are aware that the Management has decided to carry out the various activities for improvement of infrastructure/ Distribution system through;

- a) bifurcation/trifurcation of 11 KV overloaded feeders.
- b) Segregation of rural domestic load from tubewell load in rural area.
- c) Provision of HVDS system in theft prone urban area as well as theft prone rural villages.
- d) Release of all pending tubewell connections on demand.

All the above schemes would require sufficient funds at the disposal of DHBVNL which shall be arranged through NCRPB, REC, APRDP and NABARD etc. All the above agencies require proper preparation and timely submission of the schemes.

To prepare the schemes, the following guidelines are issued:-

1. All the towns under NCR (the list of which already stand sent to your office) are to be covered under the scheme. Kindly see NCR map on our website and NCR scheme guidelines on website and make your schemes. The NCR districts of Faridabad, Gurgaon, Nuh and Rewari and counter magnet town of Hisar city should make schemes for NCR funding for Rs.100 crores each. Gurgaon district may prepare more schemes for its urban areas including colonizer areas apart from its rural areas.

2. Under APDRP the Class-III category towns may be included for preparation of the schemes. The list of class III towns is available on our website- you may prepare schemes for such small towns. We would prefer if under APDRP scheme each circle can give us schemes worth 100 crores each. All the Class-III category towns may be included for preparation of the schemes to the tune of Rs.100.00 crores for each district.
3. The scheme for renovation, improvement of infrastructure of electric supply in respect of irrigation canal network under Bhiwani & Narnaul circles are to be prepared separately. The provision of independent feeders, replacement of old & worn out equipment etc .for electric distribution system of irrigation canal system can be considered while preparation of the schemes. Since all the expenditure shall be borne by the Irrigation Department through its own sources.
4. NABARD is also likely to start funding power projects during the current financial year. If any circles had made schemes for financing under NABARD RIDF, they may look at the earlier schemes and formulate new schemes on the same pattern. We would prefer to have some schemes from all circles for RIDF worth 100 crores each.
5. As you are aware the financing can be taken from various agencies but it is very important to have a shelf of schemes ready for submission to funding agencies. Hence it is vital that schemes under various categories- as suggested in the annexure attached- are formulated from which the head office can pick up schemes tailor made for requirements of funding agency and early take the loans.

It is again directed that the various schemes may be prepared on the above basis and sent to this office at the earliest for further submission to the quarter concerned within a fortnight.

**Chief Engineer/PD&C,  
DHBVNL, Hisar.**

CC:

1. Sr.P.S. to Managing Director, DHBVNL, Hisar for the kind information of the M.D.
2. Sr.P.S. to the Director(OP)/Projects, DHBVNL, Hisar for the kind information of the Directors.
3. Chief Engineer/OP, DHBVNL, Hisar/Delhi. They are requested to issue directions to SEs/OP to submit the requisite information as well as schemes for their circles within 15 days.
