UTTAR DAKSHIN HARYANA BIJLI VITRAN NIGAM

MVLC (Medium Voltage Line Cover) is to be made up of UV resistant abrasion resistant polymer with non-tracking properties and is used to cover 11KV bare conductors so as to reduce flashover and prevent outages caused by trees and birds coming in contact with the conductor. It must be flat when supplied originally and should be easy to install (even during live condition with all safety precautions). wherein flat form should turn to round shape by locking itself. MVLC of different cross-sectional areas should be available for different conductor sizes. The product needs to be supplied in rolls of 30 meters length (as per ordering size). The high dielectric strength MVLC material should be UV stable as well as tracking and erosion resistant. The MVLC should be electronically cross-linked to create an extremely robust insulation system ensuring many years of reliable operation in the harshest environments. Product offered should have more than 15 years of field-proven experience with HV products in harsh environments.
